

# AWNING DECK REPLACEMENT

## INSTRUCTIONS

### STEPS

ⓘ 2 person job

1 Retract the awning fully. (Closed position)

2 Disconnect the power so that the motor wire is free hanging (if the awning is motorized).

3 Apply a strap/rope around each arm so that they can not extend and tie to the square bar. Be sure the arms are tied tight so they can not extend when released in the next step.

4 Detach the arms from the front bar at the wrist where they meet (one bolt per arm).

5 Remove motor side bracket from the square bar with the bolt on top and pull down the fabric roll and front bar.

6 Place the fabric roll and front bar on sawhorses or a clean flat space.

7 Remove front bar end cap on one side. Remove any fabric locks then slide the front bar off the fabric carefully.

8 Unroll the fabric off the tube and slide it off the tube.

9 Carefully slide the new fabric on the tube the same way the old fabric was removed. Keep in mind that the side of the fabric that is exposed when the panel is received, will be the side that slides on to the tube. Then roll the fabric up on the tube. Be sure the fabric is centered and rolled up tight. (Replace any fabric locks you removed).

10 After the new fabric is rolled up on the tube you can slide the front bar back on the panel the same way it was removed. Be sure the fabric is centered on the front bar and replace any fabric locks that were removed.

11 Now that the new fabric is on the tube and the front bar, you may reinstall to the frame the same way it was removed. Install the idler end of the awning first, then put the motor bracket back on the square bar. Be sure to tighten the top bolt on the motor bracket so it is secured.

12 Reattach the arms to the front bar at the wrist the same way they were removed. (One bolt per arm).

13 Rewire the motor to the power source and make sure it is live.

14 Remove straps/rope from the arms and square bar so the awning may extend when operated.

15 Test the awning by running it out then back in, make any limit or fabric adjustments at this time.

16 Awning deck replacement complete.
